

SELECTION GUIDE

For paint & texture applications

Graco's range of spray equipment for Fine Finish, Professional Airless, Heavy Duty, Texture, Cleaning, Pavement and Marking applications.

EASYMAX™ WP

EASYMAX™ WP

PROFESSIONAL AIRLESS PAINT SPRAYER IN THE PALM OF YOUR HAND
EasyMax™ offers: PROSPRAY™, a real professional piston pump design which:
■ delivers comparable performance to Graco's professional corded airless sprayers
■ sprays material designed by paint manufacturers – no thinning required!
■ provides a consistent, even spray pattern for one-pass coverage

The EASYMAX™ can be used as a maintenance gun to repaint objects, to repair walls sprayed before with a normal paint sprayer, to spray paint jobs up to maximum of 50 m². The ideal tool to spray rooms with different colour walls, ceilings, etc... Use EASYMAX™ WP for water-based materials only.

BENEFITS EASYMAX WP

- PROSPRAY™ RAC® tips, with a professional reversible tip design.
- Integrated PST tip and guard shuts fluid off at the tip for a clean pattern
- Delivers a professional quality finish with expert results.

ST MAX™

395 STAND / 495 STAND / 495 LO BOY / 495 HI BOY / 595 HI BOY

The ST MAX™ product family is itself excellent for little professional jobs such as renovation, family houses, fencing, parking lots and little commercial projects. Ideal for renovation and painting walls, ceilings, interior as well as exterior.

This entry-level paint sprayer for the professional painter, has been developed with breakthrough technology such as the SmartControl™ 2.0, vertical EasyOut™ pump filter, TiltBack™ design (on Hi-boy) and a totally enclosed motor.

The complete range, with pressure up to 230 bar and tip sizes up to 0.025" consists of 3 basic models, with stand, Lo-boy or Hi-boy configurations.

BENEFITS ST MAX RANGE

- Graco 'Big' technologies in a 'mini' size.
- Airless spraying removes the need of for compressor.
- Fastest application method for paint.

ULTRA® MAX II

ULTRA® MAX II 695 / ULTRA® MAX II 795 / ULTRA® MAX II 1095

The ULTRA® MAX family is Graco's most popular electric airless paint sprayer for professionals! Ultra® Max stands for high performance and reliability.

With over 25 years experience of proven quality and unmatched on-the-job productivity, professionals ask for Ultra's. The ULTRA® MAX II is the ideal unit for medium to large painting jobs, inside as well as outside! Your most reliable buddy for renovations, new constructions, commercial and residential buildings, exterior facades, new housing pro-jects, etc. It handles most common tip sizes and heavier coatings with ease!

The ULTRA® MAX II sprays perfectly acrylics, primers, emulsions, waterborne as well as solvent based paints.

BENEFITS ULTRA MAX PLATINUM RANGE

- Integrated hose reel.
- Start your spraying job faster and go home sooner without the hassles of hose handling.
- Precise pressure control at the end of your hose. Fine-tune or shut down your sprayer from wherever you are spraying. Finer finish and reduced overspray (thus, wasted paint).
- E-Lock™ theft-deterrent. Just like with your car. Lock your sprayer while unattended. Will discourage any thieves.

°C-MAX™

°C-MAX™ 1513 / °C-MAX™ 3023

During the past 5 years, material manufacturers have spared no time nor expense to develop new generations of paint, meeting new market demands, such as:

- Spraying with less overspray, to increase application domains
- Protecting the environment: reducing the exhaust of hazardous components (VOC: 2010)
- Working more efficiently by applying thick coatings in one pass such as fire retardants and anti-corrosive paints.

°C-MAX™ HEATING SYSTEMS

New material developments go hand in hand with new innovations in spraying equipment.

To respond to these new trends, Graco has extended it's spraying line for painters with °C-MAX™.

The °C-MAX™ heating system works like a kettle. An electric resistance inside the °C-MAX™ hose is kept in contact with the paint and heats the material gradually over the length of the hose. The °C Control, the electronic brain, guarantees a gradual temperature setting of up to 60 °C and is programmed for Graco piston pump technology.

2 models are available: °C-MAX™ 1513 and °C-MAX™ 3023, with respectively 15 and 30 m hoses, supporting a 0.013" and a 0.023" tip.

GMAX™ Proconnect™ Optimum

GMAX™ II 3900 PROCONNECT™ OPTIMUM / GMAX™ II 5900 PROCONNECT™ OPTIMUM / GMAX™ II 7900 PROCONNECT™ OPTIMUM

The GMAX™ II 5900 and 7900 HD PROCONNECT™ OPTIMUM are the answer for high production professional contractors who demand uninterrupted performance with freedom from electric power. True power horses (with respectively a 160 or 200 cc Honda engine) they can easily spray all thicker coatings. They can even apply the whole range of primers and paints.

When used with a hopper, you can work for longer periods of time before refilling: perfect for larger amounts of material.

The GMAX™ II 3900 PROCONNECT™ OPTIMUM completes the line and is the perfect sprayer for the professional contractor working on new residential construction job sites.

BENEFITS GMAX RANGE

- Integrated hose reel.
- Start your spraying job faster and go home sooner without the hassles of hose handling.
- Advanced microprocessor SmartControl™ delivers Graco's most consistent spray fan.
- ProConnect™ pump removal system for fast and easy pump removal.

GH™

GH 200 / GH 230 / GH 300

GH™ heavy duty gas driven airless sprayers for your heavy duty jobs. Major advantage of Graco's GH-range is the extreme reliability of the hydraulic motor technology. The fast change-over design increases the motor efficiency and guarantees uniform pressure at the gun.

The GH™ units are compact and easy to transport and handle around a job site, and the chromed and welded cart are designed to last for years of hard use. Graco's GH™ range has standard MaxLife™ sleeves and offers the option to change from gas powered to an electric motor design, simply by sliding in the customised motor kit. Graco further completes these proposals with its GH™ Roof Rigs sprayer, that can be used for stripping applications as well.

BENEFITS GH RANGE

- Convertible Gas – Electric with no tools
- High efficient hydraulic pumping power
- With ProConnect™ & MaxLife™ piston

AIRMAX™

AIRMAX™ 1310G / AIRMAX™ 1720G

Designed for the serious professional contractor, these severe duty air compressors are built from the highest quality components to meet the rigorous requirements of any job.

Available in four models, you can be sure there is an AirMax™ Air Compressor to satisfy all of your specific air need.

BENEFITS AIRMAX RANGE

- Heavy-duty regulator with two gauges for tank and outlet pressure
- Industrial-grade pressure switch
- Stainless steel braided discharge hose for long life
- Manual drain valves for simple, quick maintenance

HVLP TURBOFORCE™

HVLP TURBOFORCE™ 7.0 / HVLP TURBOFORCE™ 9.0 / HVLP TURBOFORCE™ 9.0

HVLP spraying is possible for everyone, the full professional, as well as the first time user. "Plug & Spray" we call it. Unpack your unit, fill your material cup, plug in the unit and spray! To make it that EASY, we needed breakthrough solutions!

Graco's HVLP TurboForce™ turbines can be used on a daily basis. They were especially developed for the on-site contractor who sprays doors, trims, staircases, small renovation jobs, fences, etc. Ideal for detailed and controlled fine finish applications. For flawless spraying of dyes, inks, stains, epoxies, lacquers, varnishes, stains and multicolour.

BENEFITS HVLP RANGE

- Portable turbine as there is always a fine finish job to do.
 - Outstanding finish quality and excellent spraying control
 - TurboForce™ power to seriously reduce material preparation time and cost
 - TurboForce™ technology
- Save on your electricity bill! Most efficient conversion rate from electrical power to air flow thanks to TurboForce™ technology.
- Automatic EDGE™ gun that adjusts all the controls by itself and for the way you want to spray

FINISHPRO™

FINISHPRO™ 290 COMPACT / FINISHPRO™ 290 HI BOY / FINISHPRO™ 390 COMPACT / FINISHPRO™ 395 HI BOY

The FinishPro™ offers a high-quality finish at a high production rate. The FinishPro™ 290 fits perfectly as a professional fine finish unit whereas the FinishPro™ 390/395 handles the most challenging materials.

The FinishPro™ is the ideal unit for larger fine finish jobs. The FinishPro™ has been tested and approved to spray a wide range of lacquers, acrylic, primers, enamels, varnishes and acrylic interior paints, out of the bucket. The ideal unit for renovation of cabinets, lighting fixtures, shutters, fences, trims, stairs, staircases, or for painting doors, walls, decks and ceilings.

BENEFITS FINISHPRO RANGE

- 2 in 1
- Combine the advantages of Air-Assisted Airless and Airless spraying with one unit. Top finishing at high speed, without dilution of fine finish materials.
- On-board compressor
- Design optimised to the needs of the sprayer
- Provides high output in compact size.
- Compact sprayer design
- More flexibility saving set-up and transport time.

EASYMAX™ FF

EASYMAX™ FF

PROFESSIONAL AIRLESS PAINT SPRAYER IN THE PALM OF YOUR HAND
EasyMax™ offers:
■ PROSPRAY™, a real professional piston pump design which:
■ delivers comparable performance to Graco's professional corded airless sprayers
■ sprays material designed by paint manufacturers – no thinning required!
■ provides a consistent, even spray pattern for one-pass coverage

The EASYMAX™ can be used as a maintenance gun to repaint objects, to repair walls sprayed before with a normal paint sprayer, to spray paint jobs up to maximum of 50 m². The ideal tool to spray rooms with different colour walls, ceilings, (garage) doors, radiators, cabinets, carports, garden sheds, fences, staircases, furniture (new or renovation), etc.

Use EASYMAX™ FF for solvent and water-based materials

BENEFITS EASYMAX RANGE

- PROSPRAY™ RAC® tips, with a professional reversible tip design
- Spray in layers of 50 micron or less
- The combination of high/low switch and pressure control knob, allows adjustment to optimal spray pattern for each tip, material or application, offering unmatched results.
- 25% lighter than EasyMax™ WP

ACCESSORIES: HVLP, AIRLESS & AIR- ASSISTED

USE GRACO ACCESSORIES TO GET MORE OUT OF YOUR SPRAYER!

Whether you choose to work with HVLP, Air-Assisted Airless or Airless, all of these sprayers perform better when using the right accessory. Therefore Graco developed an extensive range of tips, filters, guns, extensions, rollers, hoppers, fluids and much more. The right selection will improve your comfort, safety and above all the quality of your finish!

MARK V™

After introducing the **Mark V™** to the market in the mid nineties, Graco became a real trendsetter for spraying plasters airless. The speed of airless, combined with a very smooth finish, became a standard in the industry. Easy, quick and reliable, the **Mark V™** boasts a strong positive track record. Listening to contractors, all over Europe, this all-rounder was gradually adapted to the most demanding wishes of our customers.

With the **Mark V™ Platinum** edition, one more step was added to this very interesting challenge. Equipped with a hose reel system, electronic theft deterrent system, wireless pressure control and automatic AutoClean™, the **Mark V Platinum** has really everything to set a new trend. This unit will make your work even easier and very comfortable.

The **Mark V™** sprays latex, emulsions, acrylics, epoxies, blockfillers, fire retardants and most common airless plasters. It even has enough performance to deliver the necessary flow for 2 people spraying paint simultaneously.

BENEFITS MARK V PLATINUM RANGE

- Integrated hose reel. Start your spraying job faster and go home sooner without the hassles of hose handling.
- Precise pressure control at the end of your hose. Fine-tune or shut down your sprayer from wherever you are spraying. Finer finish and reduced overspray (thus less wasted paint).
- E-Lock™ theft-deterrent. Just like with your car. Lock your sprayer while unattended. Will discourage any thieves.

MARK V™

MARK X™

The most powerful electrical sprayer in the Graco range. In a few words, this sprayer got its name simply because it is twice the **Mark V™**. Twice the flow. More than twice the maximum hose length with the ability to spray a broader range of materials. Contractors are looking for a machine that can plug anywhere, regardless the job site. The **Mark X™** offers the capabilities of a 380 volts machine, yet it plugs in a regular 230 volts socket.

On top of that, the **Mark X™** is designed to remain compact. This means only one person needs to handle it. Even for loading and unloading from a truck. The cart has been designed like a sled so the sprayer can slide on its cart in and out of a vehicle. The **Mark X™** is equipped with two large 13" tyres. All terrain. Wheel the unit over any job site obstacle without an issue by pulling on the telescoping handle of the frame.

The **Mark X™** sprays latex, emulsions, acrylics, epoxies, blockfillers, fire retardants and most common airless plasters.

BENEFITS MARK X RANGE

- Double your production. More than twice the output of a Mark V.
- Double your reach.
- Double your turnover.

MARK X™

T-MAX™

The **T-Max™** is a real solution for applying plasters, rather than just a spraying machine. We designed this new sprayer, so that one person can use it: easy to handle, use and clean. You'll be amazed by the high quality finish of the sprayed material, reducing scraping of the material to a minimum.

The **T-Max™** also makes your work more comfortable and generates time savings up to 30% compared to conventional application methods. Using this innovative sprayer, you'll soon notice that this strong performer not only supports one person, but can easily support a team of 3 people, applying more than 500m² a day.

The **T-Max™** has been specifically designed to apply most interior plasters and fillers. Using the **T-Max™** in combination with an external compressor, decorative plasters with particles up to 1.5 mm can be sprayed also. The **T-Max™** has been tested and approved to spray the most demanding plasters, mixed or premixed, that are currently on the market.

BENEFITS T-MAX RANGE

- A very smooth finish: A lot less scraping, up to 30% savings possible compared to manual work.
 - Up to 30 meter hose possible: Spray a complete villa without moving your sprayer or material.
 - Spray airless or air-assisted.
 - Applies almost all plasters without a compressor.
- Spray decorative materials using an external compressor.

T-MAX™ 506 / T-MAX™ 657

RTX™

The **RTX™ 1500** is packed with innovative features and performance points – designed for the professional texture contractor. The **RTX™ 1500** is Graco's solution for the interior application of decorative materials.

With its 57 liter hopper, the unit fits smaller to medium size projects to spray Simulated Acoustic, Drywall Mud, Elastomers, Deck Coatings and EIFS / Synthetic Stucco materials.

The **Rotoflex™ HD Pump**, in combination with the built-in air compressor, offers the ability to pass large aggregates without damaging them or the pump.

BENEFITS RTX RANGE

- QuikChange Rotoflex™ Pump Section.
 - No-tools pump removal and replacement.
- Changes in less than 5 minutes thanks to the QuikChange Rotoflex™ Pump Section.

RTX™ 1500

AQUAMAX™ - E

Professional electric cleaning system

Introducing electrical pressure washers for the professionals. Performance and construction withstands real job site situations day in and day out. Yet, providing the silent power of the electric engine only runs on trigger pull.

Fully loaded with end-user convenient features and with all necessary accessories in one easy-to-carry package:

- Automatic start/stop. **AquaMax-E** only runs when you trigger the gun.
- Ergonomic spray gun with soft grip and a unique Quick Disconnect feature.
- Quick coupling system on accessories.
- Smart pressure adjustment at the gun at 400V.
- RotoBlast tip.
- Chemical injector tip and 4l chemical tank with cap.
- Standard 90 cm angled lance for floors, ceilings and general cleaning.
- Short 50 cm lance for wall cleaning where space is tight such as on scaffolding.
- 15m DN6 hose.
- Hose reel (305S has hose guide) standard.
- Pressure gauge.
- Chemical adjustment knob from 0% to 5%.

BENEFITS AQUAMAX-E RANGE

- It cleans. Serious impact with combination of flow and pressure.
- It is quiet. With automatic on/off, engine only runs on demand.
- 1450 rpm. Provides the life professionals demand.

AQUAMAX™ - E 2330 / AQUAMAX™ - E 2335 / AQUAMAX™ - E 3050

AQUAMAX™

Our compact direct drive pressure washers offer enough horsepower to tackle most cleaning and preparation jobs.

The belt driven pressure washers are Graco's top-of-the-line cold water units, designed to tackle the toughest cleaning jobs.

They offer features that are required in severe-duty applications. And if cold water just won't remove the dirt, we now offer a hot water pressure washer in our range: the **AquaMax™ S540 GHW**. No job is too big for our hot water pressure washer.

When choosing Graco, you can be assured that you are choosing the highest quality product.

BENEFITS AQUAMAX RANGE

- Highest performing Honda and Briggs & Stratton engines for the toughest professional cleaning jobs: surface preparation, chemical treatment, horizontal cleaning, etc.
- QuikDisconnect™ tips and chemical injector kit, very easy to exchange, covering the widest range of applications
- Tubed pneumatic tyres, gun and hose holder for easy transport and storage.
- Gardena® water hose connection

2525 DIRECT DRIVE / 2730 DIRECT DRIVE / 3540 DIRECT DRIVE / 3540 GHW DIRECT DRIVE / 4043 BELT DRIVE

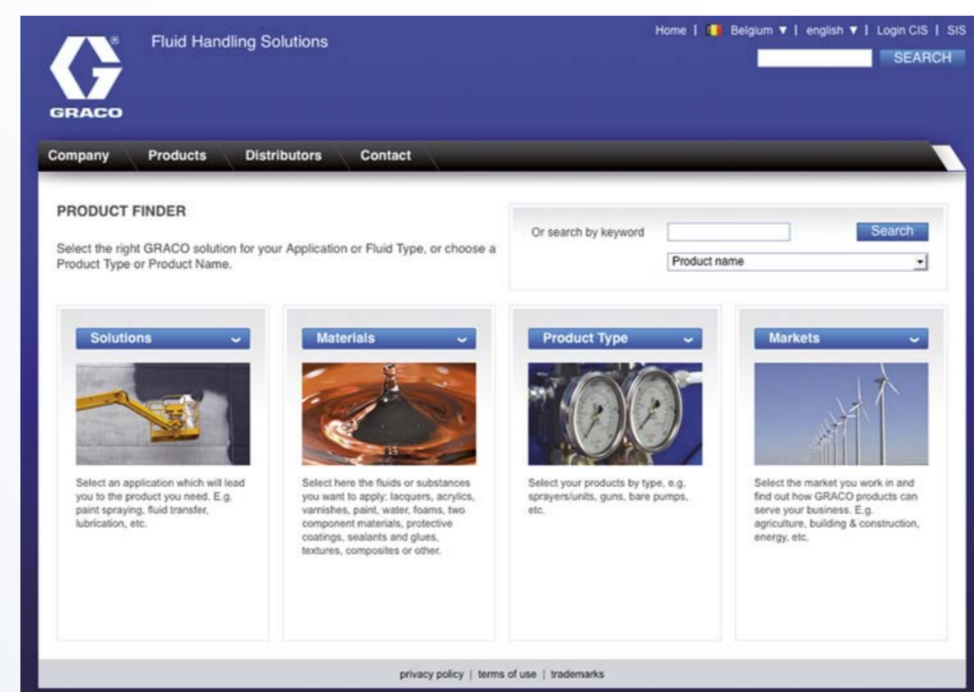

DISTRIBUTION & SERVICE

When you invest in Graco equipment, you get more than just a product. It also includes support and service that starts at the moment of your purchase.

TRAINING

Everyone can easily learn to start spraying, but to become an expert in spraying with an airless paint or texture machine, it is recommended to know more than just the basics. Graco provides **trained specialists** to show you easy set-up and spraying techniques. Our online product finder offers short **set-up films** that show all operations step-by-step per product group. Visit www.graco.com for all detailed product specifications, related accessories, brochures, manuals and application films.

Find all details in the product finder on

www.graco.com

DISTRIBUTION

To guarantee customer satisfaction, GRACO promotes its products only through a vast network of **specialized distributors and service partners**. Our Authorized Distributors provide quality advice on products and prices, tips on how to get started, spray training, maintenance and repair service within a minimal distance from your job site. Graco Authorized Service Partners have trained technicians and stock most of the spare parts in house to overcome downtime. The use of genuine Graco parts guarantees the highest quality service. Find your local Graco distributor on www.graco.com.

FIELDLAZER™

GMAX™ II 3900 PROCONNECT™ OPTIMUM / GMAX™ II 5900 PROCONNECT™ OPTIMUM / GMAX™ II 7900 PROCONNECT™ OPTIMUM

With the **FIELDLAZER™**, Graco introduces airless spraying advantages to fields. Unlike transfer pumps that disperse, the airless principle atomises paint. This results in uniform, bright lines in only one pass. At only 36 kg, the **FIELDLAZER™** is one of the lightest equipments available today for sports fields. This greatly reduces operator's fatigue and enhances manoeuvrability for corners and center field circles.

VERSATILE

With its airless pump, painting of logos and letters on the field is extremely simplified. With the extra large filter mounted on-board, together with the self-cleaning tip, tip clogs and their hassles are a problem of the past.

BENEFITS FIELDLAZER RANGE

- Straight lines independent from underground due to side mounting.
- Versatile to spray logos and advertisements.
- Limited ability to be used as (fine finish) paint sprayer.

LINELAZER™

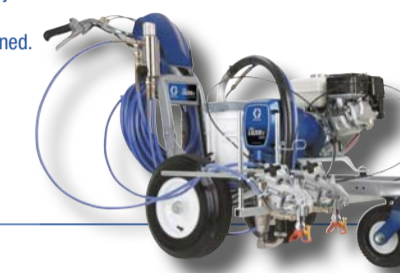

LINELAZER™ 3400 / LINELAZER™ IV 3900 / LINELAZER™ IV 5900 / LINELAZER™ IV 200HS

Graco has been excelling in the manufacturing and engineering of advanced airless stripping solutions. Each new generation introduces new technologies and new features. We commit to continuously improve and exceed our professional stripping contractor demands.

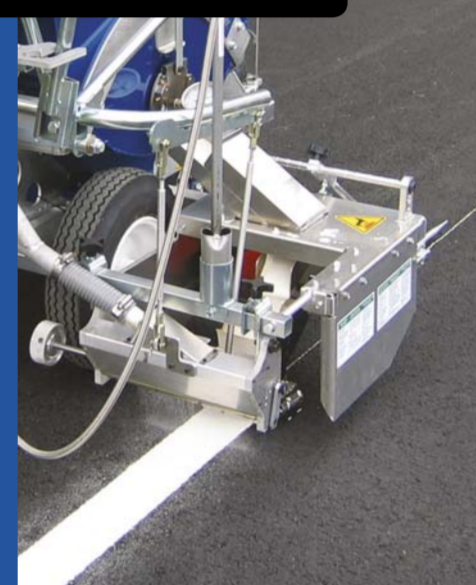

THE LINELAZER™ IV 3900 and 5900 and 200HS have all the newest technologies of **LINELAZER™ IV** to deliver precise and consistent lines. Ideal for parking lots and for street marking. The performance of these very versatile linestrippers meets the requirements of municipalities, secondary road and city striping jobs.

BENEFITS LINELAZER RANGE

- Speed. Professional striping contractors strive for continuous improvement in the line quality and definition. They need to complete a job quickly and efficiently. They require maximum versatility of their system and easy adjustments. At the same time, a system must be fast to set-up and fast to clean.
- Line quality. Lines need to be even and remain consistent throughout the job. They must be absolutely straight with sharp, crisp edges. The paint must be evenly sprayed and the thickness maintained.

THERMOLAZER™

LINELAZER™ 3400 / LINELAZER™ IV 3900 / LINELAZER™ IV 5900 / LINELAZER™ IV 200HS

Thermoplastic Handliner

The **ThermoLazer™** is a highly user-friendly, innovative thermoplastic striper.

Parking lots, pedestrian crossings, signs, junctions & central reservations, bike paths, airports, transit areas ... it is all possible. The **ThermoLazer™** has been designed to melt and apply almost all thermoplastic marking materials, alkyd as well as hydrocarbon in bags and/or blocks.

A wide range of dies allows you to stripe single lines (5 - 30 cm), dashed lines as well as double lines using the "double line" screed box. Using stencils allows you to draw legends, stop and warning signs.

BENEFITS THERMOLAZER RANGE

- SmartDie™ Installation and Removal System allows quick and effortless line width changes.
- The HighCap™ Large Capacity Hopper System enables fewer refills, thus maximum productivity
- LineDriver™ compatible, reduces fatigue, improves production and provides higher line quality.

GRINDLAZER™

GRINDLAZER™ 270 / GRINDLAZER™ 390 / GRINDLAZER™ 480

Graco introduces the 270, 390 and 480 **GrindLazers™** as your solution for all of your scarifier work. With the **GrindLazer™** design, Graco creates a new standard in line removal systems. Our designers succeeded in heavily minimizing end-user fatigue by drastically reducing vibration, eliminating usage of tools, and making the **GrindLazer™** compatible with LineDriver™. With the EasyGlide™ Wheel Mount System, you'll think that you are using a LineLazer™, our line striping unit that set a new trend in the market 20 years ago!

BENEFITS GRINDLAZER RANGE

- InstaCut™ System Technology, offers "on or off" engagement of the cutting system whilst continuously moving. Allows you to "float" with cutting system when uneven surfaces occur, without using tools or engaging handles.
- Vibration Reduction Technology, special design reduces vibration, limiting user's fatigue.
- LineDriver™ compatible, doubles your production speed, improves line removal quality and reduces fatigue.

LINEDRIVER™

LINEDRIVER™ 160CC / LINEDRIVER™ 200CC

Accessory to an airless striping machine. Transforms your striper into a ride-on push-and-pull, hydrostatic driver. It doubles your production rate and improves line quality while reducing operator's fatigue.

Finish your jobs in half the time

Striping can be done faster compared to pushing manually.

Save more time on all distances travelled while not striping.

High operator comfort

There is a physical limit to how long a person can push a machine each day. Differences in street levels make manual work more difficult.

The LineDriver overcomes these considerations.

Carry more paint

The power of the LineDriver enables carrying extra paint on board. Less time is lost for refills.

BENEFITS LINEDRIVER

Independent Honda engine

The LineDriver does not take power from the striper engine.

For tight striping jobs, just disassemble and use the striper on its own.

The weight of the hydraulic engine power is on the LineDriver, not on the striper.

LineDriver drives

On reverse, the LineDriver pulls back. On forward it pushes.

Very simple and intuitive.
