

The image features a background of industrial spray booth components, including a large cylindrical nozzle assembly at the top left and several smaller, conical spray gun nozzles arranged in a row on a white surface. The STL logo is positioned in the upper right, with the letters 'S', 'T', and 'L' in a bold, orange, sans-serif font. The 'L' is stylized with a small triangle on its top right corner. To the right of the 'L' is a larger, solid orange triangle pointing to the right. Below the logo, the text 'SPRAYBOOTH TECHNOLOGY LIMITED' is written in a smaller, black, sans-serif font.

Better

- ▶ Our innovative and flexible approach to Spraybooth design guarantees you a solution that is right for your business now, and, thanks to our AquaDry air agitation system (also available as a retrofit), will also be fully geared up for 2007 EU Compliant waterborne paints.

Effective design is often the simplest. Our market leading spraybooths incorporate low noise levels, high efficiency lighting, unique air handling systems and a robust and thermally efficient construction.

Right first time. This attitude forms the cornerstone of STL's working culture. Our dedicated project management, commissioning and service teams are there to ensure that you get what you want, when you want it.

Faster

- ▶ **Production time is critical.** Nothing is more important to a profitable business than productivity. STL's high airflow spraybooths mean you spend less time watching paint dry, and more time working.

Re-work costs time and money. Our Right First Time attitude extends to ensuring that you achieve the very best finish, because clean jobs mean no rework. We will guarantee the clean air environment within your spraybooth.

Brawn and brains. Intelligent and robust, reliability has been key to the success of STL's spraybooths. Ingenious design features reduce the amount of maintenance, and therefore downtime, that your booth requires.

Cost Effective

- ▶ **The best value spraybooths in the industry.** Excellent design is not necessarily expensive design. Despite all the advantages we offer, STL spraybooths are fiercely competitive. Contact us for a quote.

A new spraybooth represents a long-term investment in your business. High thermal and electrical efficiencies, high reliability and low lifetime costs will ensure you see a return on your investment as soon as possible.

SIMPLY THE BEST

Automotive

- ▶ **Smart repair bay**
A low cost solution for fast processing of SMART Repairs without the need to utilise main production spraybooths. Wheel sprayout facilities, available in 1- or 4-wheel formats, optimise use of workshop space.
- ▶ **Panel Spraybooths**
A mini spraybooth with spray and bake cycle, for the fast processing of panels away from the main production spraybooth.
- ▶ **Spraymate spraybooth**
A fully specified spraybooth with a high speed processing capacity: a cost-effective and space-efficient package.
- ▶ **Cyclone II Spraybooth**
The ultimate production line spraybooth. A modular design concept that combines low operating costs with class leading process times, giving you the best possible profit potential.
- ▶ **AquaDry**
A proven and cost-effective air agitation system, available as a retrofit, that substantially reduces the drying time of waterborne paints. Aquadry features a high-level system of nozzles that direct pre-heated air into the spraybooth, accelerating water evaporation.

Commercial vehicle and rolling stock

- ▶ **Conversion of a work bay into a spraybooth.**
STL thrives on innovation and design. Our flexible approach allows you to cost effectively convert a work bay into a fully functional spraybooth.
- ▶ **Commercial Vehicle Spraybooths**
STL's bespoke design capability will ensure that your production facility is versatile enough for many different types of vehicles. We will create the ideal solution for commercial vehicle manufacture and repair, combining fast process times with optimum finish quality.
- ▶ **Railway Rolling Stock**
STL has designed and installed high quality conversions and standalone spraybooths for both manufacture and repair of carriages and locomotives.
- ▶ **Full Production Line Facilities**
STL has designed and installed bespoke production line facilities for some of the largest CV manufacturers in the UK, offering not just high quality, high volume production but a return on investment in just three years on paint costs alone!

Industrial

► The Experience and the Expertise

STL's flexible and innovative approach to creating paint application facilities combines the very highest quality with fast production times and low running costs, and has benefited a variety of industrial applications, including:

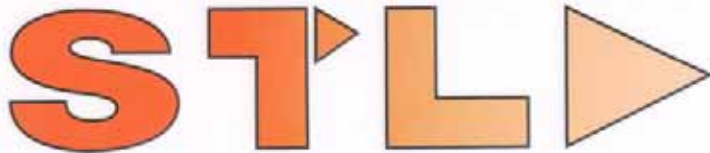

- Guitars
- Pianos
- Furniture
- Shop fittings
- Conservatories
- Ceramics
- Motorcycle components and crash helmets
- Earth moving plants
- Marine Engineering
- Boats
- GRP components
- General engineering components

► Success Becomes a Habit

Customers who have benefited from STL's superior designs and installations include, but is not limited to, the following:

- | | |
|-----------------------------|-------------------------------|
| • Cartwrights | • Kings Ferry Coaches |
| • Alstom Engineering | • Lodge Coaches |
| • Donbur | • Full Circle Engineering |
| • Fruehauf | • Weightlifters |
| • Montracon | • JM Fabrications |
| • Kings Trailers | • Perry's |
| • A Smith Great Bentley Ltd | • O'Shea Commercials |
| • Benz | • Drumcondra Accident Repairs |
| • Lawrence David | • Advanced Body Repairs |

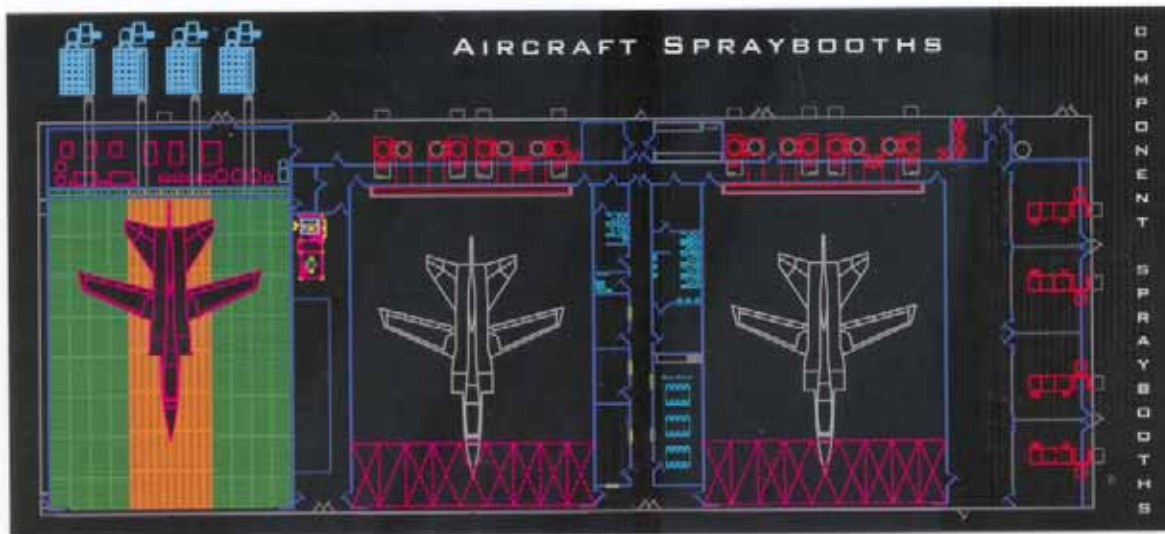

SPRAYBOOTH TECHNOLOGY LIMITED

Aerospace

▶ From the most intricate aircraft components and internal fittings to complete civil and military aircraft, STL design engineers have met the diverse needs of this very specialised industry, including, but not limited to:

- Aerospace Surface Treatments
- Aerospace Metal Finishers
- Ministry of Defence
- Gardner Aerospace
- GKN Aerospace
- MEL Aviation
- Aerospace Components Ltd
- Brookhouse Paxford

AEROSPACE

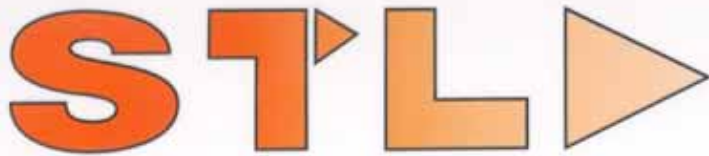

Nationwide Aftersales Service

- ▶ **24-hour breakdown response**
 - Corgi registered, field trained, regionally based engineers
 - Diagnostic technical helpline solves 40% of breakdowns without a site visit
 - 90% of breakdown call outs are answered within just 5 hours
- ▶ **All Spraybooth legal requirements fulfilled**
 - Regular maintenance is a legal requirement under COSHH and EPA
 - LEV, EPA Particulate and compressed air quality testing
 - ISO9001 calibration
 - Assessments for compliance with COSHH, EPA and general spraybooth operation
- ▶ **Low cost maintenance packages**
 - Tailored to your requirements
 - High quality spares with full warranty
 - Paint contamination advisory service
 - All manufacturers booths catered for
- ▶ **Premium DIN standard filters**
 - We only supply the industry's finest DIN compliant roof filters
 - We guarantee the clean air environment within your spraybooth.
- ▶ **The Economies**
 - Up to 70% of service agreement costs can be recovered on the fuel economy of a well-maintained burner
 - A well maintained spraybooth prevents costly re-work
 - Regular servicing prevents costly breakdowns
- ▶ **Booth moves and upgrades**
 - Relocation service for any make of spraybooth
 - AquaDry air agitation retrofit for 2007 EU compliant water-borne paints
 - EPA and Climate Control upgrades

We offer the best value for money packages in the industry.
Ring us now for a price on service, filters, spares, in fact anything!

SPRAYBOOTH TECHNOLOGY LIMITED

Company overview and contact details

- ▶ Founded in 1992 by Directors Mike Williams and Ray Arthur, STL is a company owned by engineers, and run by engineers.
- ▶ It has since grown to become one of the UK's leading Spraybooth manufacturers, with a rapidly growing customer base that includes independent bodyshops, major vehicle manufacturers dealer franchise bodyshops, commercial vehicle and rolling stock manufacturers, aircraft manufacturers and industrial coating operations.
- ▶ STL's operating base, in the peace and tranquility of Sudbury, creates the ideal environment to breed technical innovation and maintain a clear focus on the company's core values - quality, cost effectiveness and efficiency.
- ▶ STL's spraybooths enjoy the lowest energy consumption of any equivalent specification booth, and the company strives to keep one step ahead of legislation typified by the climate change levy.
- ▶ STL is totally committed to building long term relationships with our customers. Our well-earned reputation for technical analysis and problem solving means we are often called upon to assess and resolve issues that other spraybooth "experts" in the industry leave in their wake.

Call the best first.

Better, faster, cost effective.
